

**GWE PureLine®**  
Quality from the  
very beginning

**Aseptic  
well pipe system**

For the most demanding requirements in the  
food, drinks and pharmaceutical industry

**An overview of the benefits**

- ✓ Specially developed sealing system for the strictest requirements in hygiene and sterility
- ✓ Highly precise manufacture, e.g. special grind interior Ra < 0.8 µm
- ✓ Effective prevention of germ formation and buildup thanks to particularly smooth interior surface, no standing water zones.
- ✓ Production-related documentation of the manufacturing process with full traceability
- ✓ Food grade pursuant to Regulation (EC) No.1935/2004
- ✓ Available in all common stainless steel qualities
- ✓ Project-specific design
- ✓ Delivery in hygienic packaging

Water - The origin of all life, an absolutely pure gift of nature.  
 Uncompromising quality from the source to the consumer starts in the well,  
 with the PureLine® aseptic well pipe connection from GWE.

The specially developed GWE PureLine® aseptic well pipe connection, designed to be seamlessly free of gaps and dead space, is manufactured with the highest quality materials and finishes. The GWE PureLine® aseptic well pipe connection is fully ground, stained and passivated on the inside. Thanks to the minimized possibility of infiltration and the capacity to entirely remove residues, contamination with particles and germs is prevented from the very beginning.

## Technical data

External diameter connection	Internal diameter	Installation depth	Load-bearing capacity solid wall pipe	Weight
344 mm	311 mm	up to 400 m	300 kN	55 kg/running meter

Structural length: 1.0 m, 2.0 m, 3.0 m, 4.0 m, 5.0 m, 6.0 m  
 Other diameters available by request.

**We would be happy to advise you on your individual project requirements.**
